PRODUCT BULLETIN

Product(s):	Julian Anesthesia System
Bulletin Number:	131
Release Date:	January 31, 2002
Pages:	1

SUBJECT: Julian Air Cylinder Option

The Julian is equipped as standard with an air pipeline connection. For facilities without pipeline air supply, an option is available to mount an air cylinder (E-cylinder) on the right hand side of the Julian workstation. An external regulator reduces the pressure for connection to the pipeline inlet.

The kit consists of the mounting hardware and regulator. The kit can be retrofitted to all existing Julian units and is a field-installed option for new devices.

Description	Part number	Price
Air cylinder option	8604115	$595.00

For more information or questions regarding the air cylinder option, please contact Robert Clark at extension 2264
